Comments: Comment on Colville National Forest Plan Revision

Dear Forest Supervisor Rodney Smoldon,

Outdoors/good stuff. Colville National Forest/Kettle Range and other/good stuff/but so little protected.

Yes/protect and conserve for now and the future.

With current forest planning please recommend the following roadless areas on the Colville National Forest as wilderness: Profanity, Bald Snow, Hoodoo, Abercrombie-Hooknose, Salmo-Priest Adjacent, Thirteenmile, and Quartzite.

Proposed Special Interest Area designation/too weak/no enforcement/not a good choice.

Best of your offered Alternatives/Alternative P/but needs better particulars for ecological protections. I support the recommendations of Conservation Northwest and Kettle Range Conservation Group.

Thank you for including public comments on public land issues.
