765 South Main

Colville, WA 99114

July 2, 2016

To Whom It May Concern:

I support Alternative (P) with some exceptions. Stubble Height on grazing should be at the 4 inch by using ARCS guidelines, not modified ARCS.

I am not in favor of more wilderness. I prefer areas like the current Kettle Crest special interest areas.

I am in favor of more grazing and timber harvest to support our local economy. Timber harvest is important for our forage on the Colville National Forest because most of the forage is transitory with trees and a 20 year window.

I am a young rancher with plans to continue and raise my family ranching with needs of public grazing for summer forage.

Water quality is more important than road miles. How do roads affect water quality? Sincerely,

Grant Dawson
