Comments: I am writing in regard to the proposed Berlaimont Estates Road Improvement Project# 50041

Our house backs onto Berry Creek Rd and I feel that the proposed project will have a negative effect on our family and this beautiful area, not only for the hundreds of people who use it but also for the animals. It will not be the pristine place that it is today, The construction of this road will take a long time and it will be a mess, dust, bulldozers, noise, and once the road is completed, then there will be many cars carrying construction workers, dump trucks to haul dirt away and whatever other vehicles are needed for the construction. This will go on for many years.

This will take a toll on our way of life and the animals that use this corridor. Right now we can walk out our back gate and access the forest service to take a walk or ride our bike, we will no longer be able to do that. We also enjoy seeing the many deer that make their way down in the winter. It will be very dangerous for them.

This construction will not allow the public to access this area that we are all used to and deserve.

The Forest Service was put into place to protect and preserve lands for people to enjoy. I have hiked this road every day for the past 23 years and I feel sick that it is going to be taken away. There are hundreds of people who enjoy this road and area as much as I do, they will all be affected because of 19 homes. I strongly oppose this road improvement

Thank You

Jeanette Edmonson
