Comments: The Hermosa-Taylor drilling project would be a disaster on all counts except corporate profit. Air quality will be significantly impaired as will water quality and quantity. This would be very detrimental to wildlife and vegetation, including endangered, threatened, and other special status species and wildlife movement corridors. It poses a great threat and burden to traffic and public safety. In return for a few temporary jobs it would greatly reduce tourism and outdoor recreation in our area which would be devastating to our local economy. Light and noise 24/7 are another serious concern.
