Comments: I highly disagree with the proposal to pave this road. I have lived in the valley for over 20 years, and use this area for recreation year around. This would have major negative effects on the recreational use of the Berry creek area, in addition to the addition of years of construction traffic through a very small and quiet neighborhood at the entrance to the proposed road.

I also feel that the potential degradation of wildlife habitat should be considered. This would just allow easier access for more people to a wider area that now sees little to no traffic.

I am also confused by the fact that the road gets closed to ALL traffic every winter, but just because there are people trying to build second homes that It would suddenly be OK for the road to remain open all winter. Doesn't seem right that money buys a way around the rules that the rest of us have to follow.

I also find it troubling that there is only one way in and out and have been under the impression that a second means of access/exit from the area is required for fire safety.
