Comments: Are you kidding me????? That area is under a winter motorized vehicle closure to protect wintering wildlife. Whole herds of Elk and Mule deer forced to compete for ever dwindling winter range generate millions of dollars in revenue from sportsman every season in Eagle County, use this area to winter. Mule deer bucks generate more revenue than a handful of rich second home owners. Cmon this is ridiculous! Im appalled at the notion that a piece of private property so isolated would even get consideration to be developed. Who ever is paying the forest service off and the people accepting the bribes this kind of behavior will not be tolerated.... There will be public out cry and there will be repercussions. The forest service has become a marching boy for special interest and big money and its embarrassing.... I The public is entitled to investigate this process if it becomes approved and it will happen.
