Comments: no roads should be extended and no new roads should be added for this profiteer. this property can be used as one plot or two plots. it does not need to be broken up in small plots so that this profiteer can make the most money. the 325 million citizens who own this land do not believe that this accommodation to this profiteer helps us at all. all these roads, kill animals, trees and life on earth. that is well known. it brings in invasive species of all kinds. it brings in litter, trash and contamination. the nations citizens do not want that alaska land allowed to be decimated like that. we want protection for life and for all citizens in this area

national citizens own all of the surrounding property and our property will be decimated by this development. this profiteer can make money by keeping this property intact as one site. there is no call in the area for those wanting to buy in this area. this is enclosed by public land that has a huge need to be protected.

deny this profiteers request. this is just opportunism on the part of the opportunistic developer and we do not need to put ourselves out for him to make big money. he can still sell his property and make money. this developer will impact all national citizens harmfully by his plans.

this developer should not be entitled to harm national citizens 325 million strong who own the surrounding property. the actions of this developer will hurt every other person in america. american citizens have a duty to protect white river for all americans. this developer is just interested in his own profiteering. deny his request. this comment is for the public record. please receipt. jean public1@yahoo.com
