Subject: little naches project

To whom it may concern

I was just informed of the project effecting the little naches area. I can't believe that what your trying to propose would even be considered! What a costly and ineffective measure that would be! Those roads where put in place long before you or I where ever around by our Ancestors for the purpose for everyone to enjoy. And after all of these years. Your going to say that the roads and trails are ruining the habitat?

How much money has been spent already in this study? I think maybe we need to start looking at where the real problems lies. And lets start with the natives and their nets in the rivers! How come nothing is ever said about that?

It upsets me also the way you push this through. The majority of the citizens don't ever even hear about these issues before its to late. Now I come to find out the deadline is the 6th for comment. Obviously the ones involved in seeing this through knows it isn't right or they would have it on a ballet for everyone to see!

for as drastic as the movement would be Financially and for the people this needs more time and input from the citizens!

Thank you

Todd Means
