Comments: Problems that need to be addressed in the meadow creek area in my opinion, dispersed camping should be in organized campgrounds. This would enhance wildlife habitat and water quality. I have witnessed people staying in campgrounds for as long as they can during the summer months.
Secondly, The shooting in public parking lots needs to stop. Almost every weekend during the summer months, I have heard gunshots and witnessed people shooting from areas designated from parking lots. Shooting in the meadow creek area should be prohibited except for hunting season.
Also, Christmas tree cutting should be limited to a designated schedule. There should be a five year relief period for trees to replenish.
Parking on or below the S - curve on county road 84 should be prohibited due to road conditions such as snow, ice, and slush. This corner gets very slick and there have been many accidents due to this.
Driving on county road 84, I have witnessed several high speed encounters with careless drivers. Signs should be posted more diligently about speed limits and awareness.
Finally, Parking should be designated to public parking lots only. This will open up the road and create less traffic and incidents.
Thank you for hearing my ideas and giving me an opportunity to express my opinion.
Layne Thorp.
