Comments: Wrangle Island project

Hello,

Thanks for considering my input for the Wrangle Island Project.

I am a commercial fisherman in South East Alaska and was born in Alaska.

I would like to see an end to all old growth logging in South East Alaska. No new roads and sustainable yield second growth logging only.

It is my view is that South East Alaska presents a unique and priceless ecosystem that should be left intact out of respect for future generations. I ask you to think for a moment ..in fact place your fingers on the globe, where there is intact wilderness left on this planet. If you do this, and you care about preserving intact wilderness then I think you will understand how precious and rare wilderness is. Now think back only 100 to 200 years and think about the change in intact wilderness. Your opinion is critical. I hope this perspective influences you.

No more old growth logging. No new roads

Thanks

Dave
