Comments: comment on a proposed timber sale on Wrangell Island,

The time has come for Southeast Alaska to no longer rely on the timber industry as an economic driver. The Forest Service should manage the National Forests in Southeast Alaska for a host of public values that support the tourism and fishing economy of today; the driving economic forces are and continue to be tourism and recreation.

17 miles of new national forest roads!

Already wolf hunting is rife <https://drive.google.com/file/d/0BzXe63D0W21AcmNiMnUzOWROV2M/view?usp=drivesdk> on Wrangell Island with "bag limits" of 5 wolves and portions of the island are subject to Alaska's infamous "intensive predator management program" encouraging even further reduction of the wolf population. As we have seen on Prince of Wales logging and roads initiate many harmful effects, including the "overharvest", ie. poaching of wolves.
