Comments: Wrangell Island Timber Sale/Project

Dear Forest Service:

The way the Tongass is being logged is not working. I've lived here for 50 years and every year the forest gets sparser and sparser. What's wrong with you people????

They are not growing back as you have projected, any fool can see that. The clear cuts are NOT TEMPORARY MEADOWS!

I just returned from Sweden, granted the Swedes are not so happy with the way things are in their "crop" trees, but as far as I'm concerned it works a lot better than our bombed off land. Their animals have a place to live and they are able to log all the time. They replant and actually manage their trees. Take a look at what they do and stop destroying what we have.
