Comments: Wrangell Island Project

To Whom It May Concern,

I am writing today to insist that you consider the alternative plan, the Small Mill & Wildlife Alternative, submitted by the Wrangell Resource Council & SEACC for SUSTAINABLE logging on Wrangell Island.

By your own estimations, all the alternatives considered in your current plans are economically infeasible & would result in old growth timber being logged WITHOUT the benefit of any value-added processing AND all the yellow cedar could be sold overseas.

Have we not learned anything after all these years? These trees are irreplaceable & Americans will be PAYING to log them & send them overseas! Get a grip people!

Take another look, with open eyes this time around.
