Comments: I feel the Gallatin Forest is not serving the public. The National Forest was created for the benefit of its natural resources. You don't log the dead trees, you don't log the burnt trees, you are putting too many restrictions on mining. You are closing existing roads that make access unavailable to the disabled and seniors. The roads were put in there for a reason, your "user created road" statement is false. Roads were created when it was legal, and most of the roads you are calling illegal were created by the FS. Now with all the local land owners closing off access so they can have their private access and the FS closing roads the public can not access our land. We need more open motorized areas.
