Comments: Middle Cottonwood trail has been voted "Bozeman's Best Hike" for multiple years. It needs protection!

Groups of motorcycles now destroy the trail, and their Noise Pollution fills the forest for MILES.

A chainsaw has 120 decibels. The human pain threshold for sound is 110 decibels. Only TWO days/week are now free of this assault. Get these trail abusers off Bozeman's BEST hiking trail! Michael Sirr M.D
