RE: Little Crow Restoration Project - EA

Ms. Kelly Lawrence, Responsible Official

Thank you for giving me the opportunity to comment on the Little Crow Restoration Project; the following are my questions, concerns and comments.

1) Please keep in contact the total historic Naches Trail corridor that is presently closed to motorized use which is located in the lower elevation of the Little Crow project.

2) Maintain Public Access - Table 3-44 - Special Uses and Events:

Under Alternative 2 it is stated short term or displacement may be used for special uses and events. My concern and question is, if there is displacement of any part of an event location - would other areas/locations be identified and addressed as a re-location area in a timely matter, so disruption would not be a factor to those events?

I would support Modified Proposal Action - Plan 2; with review of the above statements taken into consideration to the Plan.

Sincerely,

Arlene Brooks
