Comments: I believe the Golden Peak Improvements Project will be beneficial to the Vail community and I urge you to support the project. In addition to bringing world-class training and racing terrain to Vail, I think there would be benefits across the mountain.

It would be advantageous to contain all racing and training to one area of the resort. By designating Golden Peak as the racing and training area, it would free up the other areas across the resort that are currently used for racing and training - this would make those areas more available to the general skiing public. Plus, racers that are sharing the slopes and lifts can be a bit intimidating to beginners, and I believe it would be safer to have all racing activities at Golden Peak.
