Comments: I strongly support the proposed Golden Peak expansion. Vail is a world class resort and is home to a renown ski club which attracts athletes from around the world. The current hill is not adequate to meet all of the training demands from all of the various snow sport disciplines. Additionally when some training is offered it can disrupt the general public's enjoyment or access to certain runs. The expansion of Gold Peak would allow all racing and training events to be held in one location. Not only would the venue be safer, but would meet the high standards and expectation of world class and local aspiring athletes. I encourage you to support this project!
