Comments: I support the proposed Golden Peak Improvements Project. Vail needs a venue that can meet the requirements to host high-caliber international events.

The current space at Golden Peak is not adequate to meet the demand for all training and racing events at Vail.

Additionally, when events are held at other locations on the mountain, it disrupts the general public's experience.

The expansion of Golden Peak would allow all racing and training events to be held in one location.

I believe the Golden Peak project would not only be safer but would also ensure the standards are met for local athletes and international events. I encourage you to support the project.
