Comments: I fully support the expansion of Golden Peak as proposed by SSVc. I feel that the complaints of the homeowners association about congestion at chair 6 are unfounded. Chair 6 is always the least congested base lift from my experience. I think that providing a world class venue for athlete training is extremely important for Vail on many levels. I also trust that the improvements can be made with cooperation between SSCV and the Forest Service as to have minimal impact on the environment. The biggest issue with local rivers at the moment is pollution from residential run off, so the home owners association would be better off correcting those issues than making up complaints against the Golden Peak improvements in my opinion. It sounds like they want the entire area near the ski mountain for themselves even though it is on public lands. Thank you for accepting my comments in support of the proposed Golden Peak improvements.
