Title:

Comments: As a long time local (1971) and former 6-year coach at SSCV this project has been a long time coming and will transform Gold Peak into a World Class training center for National and International athletes and teams not to mention what it will do for our local kids who have high aspirations in the ski and snowboard competition arena.

It will also be a big boom to the local economy during a shoulder season when business is generally slow in the Valley. In addition it will do a lot to help set Vail apart from other world class resorts.

As a former FIS World Cup and Olympic Race Director I only see good things coming from this project and ask that this request be granted.

Best regards,

Ted Martin
