Comments: I am writing to support the proposed Golden Peak Improvements Project. This is an amazing opportunity that will be beneficial to the Vail community and I urge you to support the project. In addition to bringing world-class training and racing terrain to Vail, there would be benefits across the mountain.

It would be advantageous to contain all racing and training to one area of the resort. By designating Golden Peak as the racing and training area, it would free up the other areas across the resort that are currently used for racing and training - this would make those areas more available to the general skiing public. Racers that are sharing the slopes and lifts can be intimidating to skiers, and I believe it would be safer to have all racing activities at Golden Peak.

I believe the Golden Peak project would not only be safer but would also ensure the standards are met for local athletes and international events. I encourage you to support the project. Thank you for your consideration.

Max and Amie Bervy
