Comments: Please approve the expansion to Golden Peak in Vail. The area would be a huge asset to the ski area and the public by providing much needed training terrain for all competitive activities. There is too much time when the present terrain is unavailable to ski club for training and as hard as our young athletes work, it is a shame to handicap them by keeping them off the hill during very important times. It would also give the public use of the Cookshack area by chair 2 and would cut down on the traffic near freestyle competitions.

We used to have a condo at the bottom of Gold Peak before moving to Edwards so we are very familiar with the growth and expansion of Vail as well as view corridors and we can see no reason why this development this should not happen.

Thanks,

Betsy and Dirk Nevin
