Title:

Comments: The benefits of this new training venue far outweigh any negative impacts. Currently the SSCV participants are continually mixed with the skiing public, sometimes creating negative feelings toward our local youth. This venue will allow further separation of the training from the more public use areas, especially during the major event time periods such as the Burton Open.

It will also allow the potential for larger Alpine Skiing events to be held locally, not always in Beaver Creek. From my understanding the venue will be homologated as a Ladies Super G and Giant Slalom that could be used for World Cup events. This is exciting for the Town of Vail and the businesses therein.

We look forward to seeing this approved and moving forward.
