Title:

Comments: The proposed project, though on the surface a beneficial project, would likely impact the reason that Golden Peak got it's name: the strong, vibrant aspen colony that colors gold in the fall. The additional cuts in the aspen forest will forever impact the view from the valley floor, especially in the fall.

The impact on the stability of the hillside and the flow of surface and subsurface water are also suspect and of serious concern.

I do not support the project as proposed in and request that the proposal be denied as submitted.
