Comments: I am writing to state my strong and enthusiastic support of the Golden Peak improvements. I am surprised that anyone would be opposed to these improvements and am confused by such opposition.

As a resident of the Vail Valley since 1975 I think we should step back and remember the improvements consist of a t-bar lift and several limited ski runs among a vast multitude of existing ski runs much wider and much longer. These are not major mountain changes, but the completion of something started back in the 60s.

The improvements will dramatically improve the training options for SSCV athletes with limited if any impact on the "Vail experience." Let's take a chance and make things better for the kids. How many of them are opposed?
