Title:

Comments: I am a full-time ski racer at Ski Club Vail. I live right in Golden peak. Ski racing has been a huge part of my life, in fact, my family moved to Vail just so I could pursue my passion for ski racing. This expansion would allow us to be a lot more efficient in our training laps when we train tech, and would even allow us to be able to train speed at a FIS certified speed venue. During the peak season, the line at chair 6 gets really really long with all the guest on Vail Mountain. The expansion would allow all the racers to get away from the chair lift and more importantly out of the way of all the guests. Early season training is one of the big reasons why we as a club are so successful. This expansion would allow us reliable early season training.

I really hope the Golden Peak expansion goes through as I am more committed than ever with my ski training.
