Comments: The South Fork of the Salmon River and its tributaries are an amazing resource for many people. Camping, fishing, kayaking, rafting, and backpacking are a few of the activities that everyone enjoys along the river. It cannot be distributed more than it already has been. It should be recovering, not subject to more mining.

I oppose any action that threatens this amazing recreational resource including water quality, fisheries habitat and recreational access to popular boating segments on the East Fork of the South Fork of the Salmon and South Fork of the Salmon rivers. Further, taxpayers cannot afford to fund another toxic cleanup for a private company.

Please leave this watershed in the healing process.

Sincerely,

Devon Barker-Hiks
