Comments: I would like to comment that, as a landowner in the Tiara Subdivision near 11-mile reservoir, I fully support the Lake George Area Vegetation Management Plan. I have done a lot of hiking in the Puma Hills area and fully agree that the forest could use thinning and wildlife habitat improvement. The density of trees is too high and the meadows are shrinking. The forest management plan should help to mitigate the potential for excessively large forest fires in the area. I only wish the Vegetation Management Plan could be exercised sooner than the proposed 2020 implementation date.

Regards,

Mark Clark
