Comments: I applaud the action being taken at Lake George and puma hills for remediation of forest density and fire management.

Two comments please -

There is not enough patrol in the woods off county road 90 where people camp and leave fires. from the ridge above our community, through painted ranch and back to where 90 & 92 meet - the woods are full of morons that do need some policing.

Second while you are mitigating fires, can you please put in a travel corridor for the animals to get from Florissant to the lake - 11 mile res.

State and fed land behind our house to the east, above corral cove that is idel for elk and yet there are none. All the aspen have not been touched,

We rarely see elk over here although we do see the deer, antelope, and big horn sheep. The elk are no where to be found. and thanks goodness there are limited lion and bear.

Most the Elk are across the lake on 39 mile mountain, about 300 head year round above the rancher homestead, off the backside that faces guffy.

There is a brown bear that is in puma hills where you are going to mitigate.

Watch our for "early" as he tends to go from the lake to the woods at 5:30am every day in the Tiara subdivision.

Thanks - al Lippa 719-290-1551
