Comments: Re: Stibnite/Midas gold

I fully agree with an alternative if yet temporary road for Midas Gold to construct and maintain, but formally and adamantly against the closure of Stibnite road. there always needs to be two ways to enter and leave an area. When conditions are not,ideal, there needs to be another route accessible,quickly. By having Midas use it's own road, and the recreationalists and historians use the current Stibnite road makes sense. My children's family worked and lived in Stibnite, in fact there's a plaque mentioning relatives. Many of my relatives are elderly and cannot take a longer trip then what it is. I believe ADA might fall into place by allowing reasonable access to Stibnite and thunder mountain. Closing the road would fall under constructing a barrier to access, which is prohibited. Closing it off to Midas traffic, unless in an emergency, is and should be a separate issue then closing it off to recreationalists and historians.
