Comments: To whom it may concern,

I support the Midas gold project because of the promise of restoring lands previously mined. They also support a opportunity that may assist an economy that has been ravaged by the changes in political policies and loss of PILT and resource fees into local government and infrastructure.

As a person who grew up in Valley County and recreated throughout my life I appreciate the opportunity we all have to play in whatever manner fits our personal lifestyles. The Midas gold project has taken the time to give all persons who asked for input and have tried to accommodate the needs of interested parties.

Snowmobiling has always been close to my heart, we in the snowmobile community have worked closely with Midas to mitigate any controversial issues we might have. We believe that our working partnership with Midas can start improving safety and access for the backcountry communities, as well as improvement of the power line routes will help stabilize those areas with more dependable infrastructure.

Thank you for the opportunity for imputed.

Ron Platt
