Title:

Comments: I would request that the road to thunder mountain and stibnite remain open and accressible during the mining process, these are roads that have been used for years by my family and friends for hunting, fishing and recreation. To close these roads for such an extended time, removes areas that we use on a constant time frame, i have taught my children how to hunt and fish there, trips to thunder mountain have included mushroom hunting, picking huckleberries, looking for crystals (always a hit) going to Roosevelt to see if we can see the old town at the bottom of the lake. This is currently part of my grandchildrens education in how to survive in the wild, hikes and fishing trips into these areas are part of that education by grandad. This is a great area with amazing history as a part of American history, i would appreciate the opportunity to continue having access to share memories and experiences with family and friends.
