Comments: Please allow the stibnite mine to be an operational mine again. It will bring much needed improvement to the area. The possibilities to improve the environment and create much needed employment in the area are endless. Mining today is so much different than in the past. Their commitment to the surrounding communities and environmental repair are above and beyond what idaho needs for growth. I understand about mining because I currently work for a mining company. I know the impact of providing community support and much needed jobs. Also hugh benefits to environmental sustainability. Thank you so much for giving me the opportunity to speak up about today's mining practices and benefits.
