Comments: The South Fork Salmon and the East Fork South Fork Salmon along With the Secesh River are some of the most beautiful pristine rivers I have ever had the privilege to recreate in. As a kayaker I have always felt that each trip I have made into these places is one to be cherished. I deeply object to Canadian Midas Gold trying to mine gold in any of these drainages as it will produce both aquatic and land based pollution, cause roads to be built in a wilderness and potentially damage the amazing aesthetics of the region. Thank you for considering my comments.
