Comments: Please consider the impact of this mining project on the economic well being of Idaho. Our rivers attract recreationalists from around the state, the nation, and the world. Has a plan been put forward for preserving the beauty and access of the Salmon so there is no negative impact on the recreation industry? Additionally, please consider the needs of the people who use river resources for subsistence, such as the New Perce. Their physical health and cultural well being may be directly affected by negative impacts of mining, such as pollution or disruption of key portions of the watershed.
