Title:
Comments: I grew up in Yellow Pine in the 1960's. I have roamed the country between Yellow Pine, Stibnite and Big Creek for many years. My father was an outfitter and guide in what is now the Frank Church Wilderness. I have total respect for the environment and am convinced that having a road from Yellow Pine to, and through, Stibnite must be a part of the plan. If would not be feasible to have to drive 80+ miles on the Burnt Log road to get there. I am very concerned about the economic impact to the Yellow Pine community if there is no direct route through the mine. It is also a safety matter to have better access through the area, especially during fire season. I have friends who live in Yellow Pine and Big Creek and I also have friends who work for Midas Gold. I believe having a road through the mining property would benefit all parties. Thank you for your consideration.

Sincerely,

Kristy Gillihan Scaraglino
