Title:

Comments: I can't make the meeting. I know I'm just one voice but wanted you to hear my opinion. I prefer our national forests to be natural with no timber harvesting and no hunting. There are very few wild places left on earth for recreation, site seeing, bird watching, health restoration, plant diversity, oxygen production, carbon sequestration, pollinator production, wildlife, pollution control, water purification, etc. No, I'm not a environmental nut-hippy...just a hard working professional that loves and values nature and sees that there is less of it each and every day. I know we have some wilderness areas set aside but in the big scheme of things, they aren't near enough. Many thanks for all your hard work. -Greg
