Comments: ACP

Hello.

I am a resident of Charlottesville Va. I cannot believe its come down to writing comments to ask NOT to build any pipelines in old forest growth, or near natural waterways. These are not only beautiful areas to immerse yourself in but these areas are home to a wide range of wildlife from bears to crawdads. Destroying animals homes/trees and building pipelines with the very real high risk of oil waste being in the water, creates an irreversible unbalance to the ecosystem. I (among many others)love going hiking/swimming and drinking local in my town. All of these would be affected forever if this pipeline were to be built. It would affect future generations as well from experiencing organic beauty. Our health is also at stake. The water is used to make beer, to make kombucha, overall to DRINK just as good old fashioned water.

You're putting us at risk to drinking harmful chemicals, children to the elderly.

I want Nature to be preserved. I want my children to grow up in a world where they can see forests in their natural state, untouched by man or big corporations. I want my voice heard and I want this to actually be given a true, genuine second thought. , You can't drink money. Once it's gone, it's gone forever. Our planet is suffering enough. Please consider not allowing the ACP to come to fruition.

Thank you for your time.

Lea B
