Mailstop #1104

Washington, DC 20250

I am writing to object to the Draft Record of Decision for the Atlantic Coast Pipeline's proposed pipeline. A group of thirteen expert scientists and engineers submitted reports to the Virginia Department of Environmental Quality (DEQ) on August 22, 2017, finding that DEQ has failed in its duty to properly analyze and protect against the water quality damages the Mountain Valley Pipeline and Atlantic Coast Pipeline would cause to Virginia's waters (<http://pipelineupdate.org/2017/08/23/failure-to-meet-minimum-standards-of-scientific-proof/>)

This pipeline is fraught with problems. The Forest Service cannot throw their weight behind such an ill-planned, dangerous, and unpopular endeavor. Your main job is to protect our forest land, not to aid and abet corporate interests.

Please act responsibly.
