Title:

Comments: Atlantic Coast Pipeline Decision Objection

I am hereby submitting an objection against the Draft Record of Decision for the Atlantic Coast Pipeline.

My Name: Jeff Maurer

100 Loma lane

Charlottesville, VA, 22902

434-9884-3169

Responsible officer: Glen Casamassa, Associate Deputy Chief, USDA Forest Service

Name of national forest on which project is located:

George Washington National Forest

As I stated in my original comment, I believe the Forest Service should protect the beauty and integrity of the PUBLIC lands which I and other citizens have a right to enjoy in their unspoiled, as God intended them, natural grandeur. Instead, however, you seem intent on subverting the rights and well-being of the vast majority of We The People for the sake of PRIVATE profit for a few.

As to how this project MIGHT be somehow for the general welfare (FERC has refused to meet this requirement), that has NOT been explained, nor do I believe it could be, since it isn't.

There has also been insufficient analysis of alternatives to crossing the literally hundreds of streams this project would undeniably impact.

The project would result in dramatic fragmentation of the National Forest.

The project is incompatible with Virginia clean water standards.

The biological analysis is incomplete.

There has been insufficient analysis of high hazard / steep slope areas.

The plan can be improved and/or requirements met by not building the pipeline.

Finally, I wish to be part of the resolution meeting.

Sincerely,

Jeff maurer
