Comments: I would like to support this proposed project. I have been able to camp and hike in this area several times and it is a beautiful remote area. Developing the existing trails so they can be used by mountain bikes and dirt bikes would allow more people to experience this part of the state. I appreciate that the project does not create a lot of new trail, but utilizes the existing trails. I doubt most people in southern Arizona realize this open area exists so close to Interstate 19, and adding access to other users would allow more use of the area.
