Comments: Dear Glen Cassamassa,

I'm respectfully writing you to express my concern about the Atlantic Coast Pipeline.

As I understand it the ACP has not answered questions about "High Hazard Areas" or provided proof that they can prevent landslides in mountainous areas. The DEIS does not include mandatory information and the Forest Service is in violation of its duty to comply with the National Environmental Policy Act! The public was not given adequate opportunity to comment.

My family moved to Virginia and the Shenandoah Valley, in part because of its proximity to State and National Forests and wilderness areas. We value these as well as the state's coast and other water resources for their recreational value.

I hope that the US Forest Service reconsiders its role and responsibility to protect Virginias publically owned land and water.

Sincerely and with hope,

Charlotte Shristi
