I am writing this letter to object to granting Dominion energy the right to cross our National Forest. The reason I am objecting is because of Josiah, Titus, Rachael, and Jessica my grandchildren,

If we allow Dominion to disturb 300 feet of right away what will this do to our water source and creatures of our forest? We also will have an eye soar for 16 miles. My grandchildren or their grandchildren will never in their lifetime see the beauty of this area again.

This source of energy is suppose to last for 20 years. What about after this 20 years will dominion still maintain this pipeline or will it be left to rust away and affect our groundwater??

Mankind has curbed a lot of disease and put men on the moon!! There has to be a better way!!!

I ask you to please do not grant Dominion permission to cross our National Forest!! Please be a good Smokey Bear and protect our National Forest.

Please read this article from "The Recorder" Monterey VA Date 8/17/2017

Thanks,

BJ Kester
