Title:

Comments: As a frequent trail user throughout Arizona, I am strongly in favor of this proposal. As the first single track motorized trail system in the Coronado National Forest, I am confident that the local user community will actively embrace and maintain these trails.

This location is very favorable due to it's lack of user conflicts and minimal use. Additionally, the area contains primarily disturbed ground, and the soil and terrain suggest that required maintenance over time will be minimal.

As a recent user of the forest roads in this area, I look forward to help build, use, and maintain this trail system.
