Comments: To Whom It May Concern,

I am in favor for this project as it opens up new areas for outdoor recreation. I am a motorized vehicle user and like to ride in different locations but those are very limited. By opening up these new trails it gives the opportunity to visit other areas. Another plus is that it being setup as a multi-use area that will attract more users such as mountain bike, equestrians, and hikers which may benefit the local economy as well. Also by adding legal trails users are less inclined to "blaze" their own trails and it also helps to lessen the use at other areas by spreading out the users. This trail system is nothing but a positive thing and should be allowed to continue as planned.

Thank You.
