Dear USDA Reviewing Officer

I am objecting to the Record of Decision for the Atlantic Coast Pipeline Project through the George Washington and Monongahela Forests made by Associate Deputy Chief Glen Casamassa.

I am an intervener with FERC on the planned ACP and have commented to USDA FS before on this planned pipeline.

I object because of the lack of details Dominion Energy is required to give you concerning their Erosion and Sediment plans. The planned construction will do permanent damage to streams and riparian corridors. With the steep slopes and sheer amount of earth disturbance there will be horrific sedimentation to the now pristine streams.

Please reconsider and do not amend the Forest Service Plans to allow for this mayhem of construction.
