Comments: PLEASE Do NOT open up this pristine untouched land to oil and gas drilling. This land has been preserved until now for the public's enjoyment, and should REMAIN so. It is rated 5 stars by visitors as an untouched beautiful area to visit. Additionally, the U.S. should be taking the lead on RENEWABLE energy, NOT burning MORE fossil fuel. If the recent catastrophic hurricanes from warm oceans, and fires from unprecedented droughts and high temperatures do NOT convince you that we should be REDUCING NOT INCREASING carbon emissions, I don't know what will. STOP IGNORING SCIENCE. LEAVE THIS LAND UNTOUCHED. IT IS OUR LAND NOT YOURS TO GIVE AWAY TO YOUR DONOR DRILLING COMPANIES!
