Title:

Comments: I'm very happy to see more timber sales and activities that are addressing the beetle kill problem but when ATV trails are concerned some are totally destroyed and then when they are reclaimed they are considerably wider allowing for a larger tract to develop before growing back.

Also in places of high activity the problem of restrooms needs to be addressed. There are none, leaving sanitation a problem in the surrounding area.

The presents of USF logo's on trucks and OHV used by the USF driving through a busy area detours bad activity.
