Comments: Is there no end to the attempts to devastate our natural world for the "progress of man"? ENOUGH!!! This area is the diamond of Nevada and generates a tremendous revenue from visitors to our state. The Ruby Mountains are unsurpassed in natural beauty, and once destroyed can not be replaced. To destroy that sacred beauty for the short term acquirement of dirty energy is short sighted to say the very least. We are being eaten up by corporate America, destroying the world square miles at a time. I say not in Nevada. We have the resources right here to develop clean renewable energy, creating jobs, protecting our state from greedy, pirates. Please preserve and protect our state.
